- + New Filter helps you better filter scan results and quickly recover desired files
- + Enhanced the detection for MP3 files
- + Optimized the pop-up prompt mechanism in full screen mode
- + Fixed the program crash caused by high memory consumption

Description:

iTop Data Recovery is a no-nonsense solution for recovering lost or deleted files from Windows Recycle Bin, Hard Drive, SSD, External Disk, USB Drive, Memory Card, Digital Camera, etc. You can use it to retrieve documents, photos, videos, music, system files, and more.

Intuitive UI & Easy-to-use

With a straightforward and intuitive interface, iTop Data Recovery offers you a user-friendly recovery experience, making the recovery process as easy as a pie. You just need to select file locations & file types, run a scan and click the Recover button.

Flexible Scan Modes

Regarding different scenarios and personal needs, iTop Data Recovery provides you with two scan modes. Normal Scan performs a quick and efficient scan, helping you get your data back as soon as possible; while Deep Scan can scan your computer more thoroughly, offering you a higher chance to recover more lost data.

Detailed Preview Before Recovery

After a scan, iTop Data Recovery will display not only the basic information like file name, original location & size, but also an evaluation of the recoverability for each file. What's more, you can preview the scan results with filters to easily locate your desired files and quickly recover them.

Practical Backup Tool

Worried about data loss? iTop Data Recovery allows you to back up your important files and folders with just 1-click. And you can automate your backup tasks on schedule.

To sum up, iTop Data Recovery is definitely your ideal choice for recovering emptied Recycle Bin, retrieving data deleted by malware or viruses, and recovering data from system crashes, hard drive formatting or other errant operations. Just try it out, and bring your lost data back now!
